

INFOGRAPHIC DISTRICT COOLING SYSTEM STATISTICS IN THE STATE OF QATAR 2023

Number of Cooling Projects Operational by Economic Activity

1,138,129 (TR)

Installed Cooling Projects
Operational Capacity

59%

Plant Utilisation in
Operational District
Cooling Plants

2,743 (Million Tr)

Annual Cooling Energy
Production in Operational
District Cooling Plants

Number of Cooling
Projects Under
Design

Number of Cooling
Projects Operational
Phase

Number of Cooling
Projects Under
Construction

Number of Cooling
Plants Operational
Phase

Amount of Energy & Water Saving and Reduction of Generated Emissions

2.58 (Million tons of carbon dioxide-equivalent)

Reduction of Generated Emissions vis-à-vis Conventional Cooling Method

40%

Percentage of Saving Energy Compare to Total of Electricity Consumption for District Cooling and Electrical Saving

19 (Million m³ per year)

Quantity of Compensatory Cooling Water

10,010 (Thousand m³ per year)

Fresh Water Saving

Amount of Expenditures on Environmental Protection Activities

No. of Employees in District Cooling & Environment Protection

Cooling Plant Disposal Method by Quantity

(Thousand m³)

No. of National Agencies Which Obtained Prizes Since 2023

International Prizes

National Prizes

Environmental Commitments

3

Number of Environmental Competitions

39

Number of Specialized Training Sessions Hold by the Institution for Targeted People

24

Number of Participations in Local and External Environmental

1

Number of Coferences & Events Organized by the Institution

2

Number of researches and studies specialized in the environment - district cooling
